

ICoD membership fee structure

pricing and fee policies

The Membership pricing policy, which determines the fees for each zone, is based on per capita (P/C) Gross National Income (GNI) index, as published by the World Bank. Zone classifications and annual adjustments reflect data obtained from the World Bank as of 1 July of each year. While the zones are updated annually, the fees will be adjusted by the Secretariat every two years (non-GA years).

Zone A: GNI is USD \$20 000 and higher.

Zone B: GNI is USD \$10 000–19 999.

Zone C: GNI is USD \$2 500–9 999.

Zone D: GNI is USD \$2 499 or less.

Payment is due within 30 days of the issuing of the Membership fee Invoice.

If a new Member is approved by the Executive Board after 30 June, the applicable fee is 50% of the annual rate for that year.

Six month's written notice is required for termination of Membership. The Member continues to be responsible for financial obligations incurred prior to the announcement of withdrawal.

how to calculate

Professional: fees are calculated according to the number of full, professional members. Student and Senior/Retired members are not numbered in the per capita calculation. For example, the Membership fee for a professional organisation from zone B with 750 members would be calculated as follows

$$\text{Professional Membership Fee} = [\text{Base fee} + (\text{total number of professional members} \times \text{per capita fee})]$$

$$= 500.00 + (750 \times 2.25)$$

$$= 2 187.50 \text{ CAD } \$$$

Members are responsible for updating the membership data every year; however, fees will be adjusted by the Secretariat every two years (non-GA years).

Promotional & Educational: fees are calculated based exclusively on the zone they belong to (see next page for Zones).
